The invention describes a new isolated nucleic acid encoding a Klebsiella pneumoniae polypeptide. Also described are: a recombinant expression vector comprising the nucleic acid, operably linked to a transcription regulatory element, and a cell comprising the recombinant expression vector. The nucleic acid is useful for preparing a vaccine composition against Klebsiella pneumoniae. This sequence encodes a Klebsiella pneumoniae polypeptide of the invention
                                                                                                                                                                                           useful for
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                615 TCCGGAAGTGGCTACCAAGCACTTCACCCTGAAGTCTGACGTTCTGTTCAACTTCAACAA 674

Braun G., Cole S.T.;
"Molecular characterization of the gene coding for major outer
membrane protein Omp4 from Enterobacter aerogenes.";
Eur. J. Biochem. 137:495-500(1983).
-!- FUNCTION: Required for the action of colicins K and L and for the
stabilization of mating aggregates in conjugation. Serves as a
receptor for a number of T-even like phages. Also acts as a porin
with low permeability that allows slow penetration of small
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               126 STGVSRSEHDTGVSPVFAGGVEWAVTRDIATRLEYQWVNNIGDAGTVGTRPDNGMLSLGV

Maraun G., Cole S.T.;

The nucleotide sequence coding for major outer membrane protein OmpA

T The nucleotide sequence for the action of colicins K and L and for the action of colicins K and L and for the action of mating aggregates in conjugation. Serves as a receptor for a number of T-even like phages. Also acts as a porin with low permeability that allows slow penetration of small solutes (By similarity).

C SUBCELULAR LOCATION: Integral membrane protein. Outer membrane.

C SIMERILUAR LOCATION: Integral membrane protein. Outer membrane.

"Complete genome sequence of Salmonella enterica serovar Typhimurium
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Nature 413:852-856 (2001).

-!- FUNCTION: Required for the action of colicins K and L and for the stabilization of mating aggregates in conjugation. Serves as a receptor for a number of T-even like phages. Also acts as a porin with low permeability that allows slow penetration of small solutes (By similarity).
-!- SUBUNIT: Monomer (Probable).
-!- SUBCELLULAR LOCATION: Integral membrane protein. Outer membrane.
-!- SIMILARITY: Belongs to the ompA family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         PRINTS; PRO1021; OMPADOMAIN.
